

*Disinfection
Reimagined!*

The A, B, C's of a Healthier Classroom

In a child care setting, everything is touched, hugged, drooled on, or shared. Despite your staff's best efforts, wipes and sprays just can't reach every surface, toy, or carpet. That's where our Genesis 360 Misting System can help.

**IS FOR AIRBORNE
VIRUSES LIKE RSV
AND THE FLU**

**IS FOR BENCHES,
BOOKSHELVES,
AND BUSY LITTLE
HANDS**

**IS FOR CHANGING
AREAS, CARPETS,
AND CIRCLE TIME
MATS**

These high-touch zones can harbor: Norovirus, Staph and skin infections, influenza, colds and coughs, and other germs that spread quickly between staff, kids, and classrooms.

1, 2, 3 – Safe as Can Be.

By the Numbers

1

One Push. One Room. One Safer Space.

Genesis 360 Misting system automatically mists the room at scheduled times, while your team focuses on what matters most.

2

Two Things You Can Count On

- ✓ Safe for Kids
- ✓ Trusted by Staff

3

Three Places It Makes the Biggest Difference

- * **Classrooms:** Toys, tables, and the air your kids breathe
- * **Nap Rooms:** Mats, cots, and cozy corners
- * **Changing & Diapering Areas:** Where the littlest learners need the most protection

Reach out to add automation to reduce your daily 1,2,3's

Introducing In-Room Mist by Genesis 360™

A smart, hands-free way to keep your spaces clean, clear, and ready for learning.

The Genesis 360 Misting System™ uses precision nozzle and micro-droplet technology to apply a very fine mist.

- ✓ **360 Degrees of Coverage:** Micro-droplet technology reaches under, over, and around surfaces
- ✓ **Safety Rating:** Safe for use around infants, toddlers, and preschoolers
- ✓ **Customizable installation:** Runs while classrooms are empty — no extra labor required

Set it and forget it! Autonomous misting!

Built for early learning environments, Genesis 360 Misting System™ uses microfluidization nozzle technology to evenly apply micro-droplets across toys, nap mats, diapering stations, tables, and other shared surfaces — safely and consistently.
